Fixed-price NetApp infrastructure healthcheck

No-one's better qualified to help your NetApp perform even better

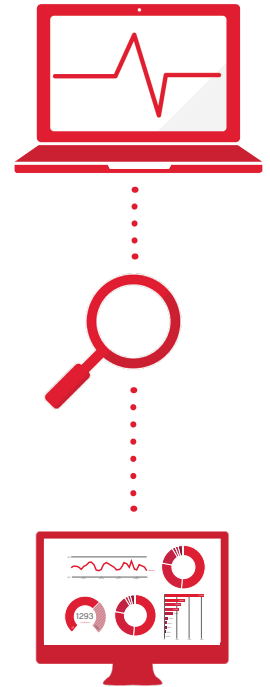

As Europe's only NetApp Support Services Certified (SSC) partner, we're the best people to talk to if you want your NetApp environment to work at its very best. Are you using it efficiently? Is there room for improvement? Let one of our experienced and certified NetApp consultants help you find out with a one-day NetApp check-up, complete with recommendations you can follow immediately or when it comes time for a refresh or upgrade.

What's involved?

After an initial call or meeting with your NetApp storage administrator, one of our consultants will review your AutoSupport data from up to two NetApp controllers and provide you with a report, outlining the findings and giving you best practice recommendations.

Two healthchecks to choose from

A Level 1 healthcheck will provide you with ONTAP and firmware version and upgrade recommendations only. To reap the full benefits of our healthcheck service, we recommend a Level 2 healthcheck, as it also includes a full configuration, cabling and performance review, plus a complete list of our best practice recommendations, delivered in person during an on-site visit. See the table below for a full comparison. Both healthchecks take one day.

What's included?

	Level 1	Level 2
NetApp hardware inventory	✓	✓
Aggregate usage	✓	✓
RAID group layout	✓	✓
Volume usage	✓	✓
Volume space breakout and growth	✓	✓
