This document

This document is meant to help establish a clear and consistent voice across Proact in both internal and external communications. Whenever we create written copy, we should follow these guidelines to ensure that our communications are consistent, clear, easy to understand and meet the needs of our audience. All content we produce should reflect, reinforce and demonstrate our core values – integrity, commitment and excellence. We should write all Proact collateral in British English, as opposed to American English. British English is the standard in the EU.

Our brand foundation and writing principles

We want to be perceived as a trusted advisor and data management specialist with focus on data centre and cloud services. As such, we want to be recognised for an innovative and customer-aligned portfolio, as well as being a thought leader in our field. We also want to be a sustainable company and a great place to work at and to partner with. We want to be associated with modernity, trust, innovation and flexibility as well as communicate our global mindset and high skill level.

Within all content we publish, we aim to:

- **Obtain trust.** We need to demonstrate we have our reader's best interests at heart. We need to communicate how they benefit. Transparency and camaraderie also build trust – so does discussing problems and offering solutions. We should combine this with a tone of empathy and support. Where possible, we should back up our claims with data (facts, figures and numbers). Communicate that we're on the same side. We're all about working with the customer; acting as part of their team. Emphasise how we know the whole market, are independent, and use our knowledge to help choose what's best for the customer, rather than push our own products and services.
- **Respect.** It's important that we treat readers with the respect they deserve. Put yourself in their shoes and don't patronise them, try to confuse them or mislead them. Try to be considerate and inclusive. Don't market at people; communicate with them.
- **Speak truth.** Try to understand the challenges of potential and existing customers. Avoid dramatic storytelling and provide real accounts of the services we offer. Focus on our current strengths and what we can deliver today.
- **Establish relationships.** Ensure that people know that we're here to help, not just to sell products and services. Use language that informs and encourages the audience to make the most of our solutions. Convey that we're a partner not a merely a reseller. Be helpful. Be honest. Imagine you're talking to a friend or family member – someone you will have a relationship within a few years' time.
- **Educate.** Tell readers what they need to know, not just what we want to say. Give them the exact information they need, especially when it comes to benefits, along with opportunities to learn more. Remember that we're the experts when it comes to our solutions. Readers might not have access to everything we know and offer.
- **Guide.** Think of yourself as a tour guide for our reader. Whether we're leading them through an eBook, our website or a brochure, communicate in a friendly and helpful way.
- **Help bridge the gap between business and IT.** Much is made of this gap. Copywriting can play an important role in helping to bridge it by using clear and simple language that everyone can understand.
- **Inspire.** It might not always be possible (not everything is super-exciting) but, where possible, we should try to communicate enthusiasm and excitement, to elicit the same response in our reader.

To achieve these goals, we should make sure our content is:

- **Clear.** Understand the topic you're writing about. Use simple words and sentences while integrating standard industry vocabulary. There's no need to simplify every term. Make the reason you're writing apparent in the introduction and don't bury your messaging. Ensure your content has a clear call to action.
- **Useful.** Before you start writing, ask yourself: what purpose does this serve? Who will read this? What's their role? What do they need to know? What will they want? What problems do they face? How can we empathise with them? Help them?
- **Appropriate.** Write in a way that suits the situation. Just like you do in face-to-face conversations, adapt your tone depending on whom you're writing to and what you're writing about.
- **Jargon-free.** Where possible, we should avoid jargon, especially that which we often use internally, or within marketing. The way we speak to each other is not necessarily the way we should speak as a brand to customers.

- **Brief.** It's essential to edit your work. Write freely then go back and look at how you can make it shorter and clearer. Make sure you're not repeating words or ideas. The ideal is to write copy that makes is easy and enjoyable to read, rather than a chore. Using short sentences and short paragraphs will help.

Personas and buyer's journey

We've done quite a bit of research into different personas – different kinds of people in different roles whom we might be speaking to. It can be helpful to remind yourself of these personas, the people behind them, their needs and the kinds of messages we should be delivering to them.

CIO	<p>The CIO is the decision maker in the sales process, so their opinions are crucial. They are often the visionary of the organisation, developing strategies and innovative propositions. Despite not fearing out-of-the-box thinking, they may be very critical of new ideas and developments.</p> <p>Writing tailored to the CIO needs to be business-objective focused and not too technical. Improving and accelerating the business is likely to be their main goal, so content must be forward-thinking and clearly demonstrate how we can offer tangible results. They are likely to take the safe way out if possible, so our messaging needs to convey advanced research and knowledge for them to make new steps with us.</p> <p>Main focus could include agility, speed, innovation, stability, reliability, innovation, flexibility, budget, market demands, security, time to operational value, accelerating business, compliance.</p>
IT manager	<p>The IT manager recognises that their role is important to the organisation as a lot depends on IT. They have responsibility for budget, managing people and role delegation. As an important advisor in the boardroom, the IT manager plays a role somewhat like an internal salesperson. They're likely to initiate discussion surrounding new technologies and solutions needed to improve IT and are often looking to minimise risk.</p> <p>To successfully communicate with an IT manager, we need to relate to their many KPIs such as efficiency, costs, performance, capacity and security. We need to demonstrate not only the advantages of our solutions and how they will help with current challenges, but how we will add value after they've been implemented.</p> <p>Main focus could include minimise risk, efficiency, reducing costs, justifying spending, usability, speed, security, resource capacity, short term focus, readiness.</p>
IT operations	<p>The person responsible for IT operations often acts as the source of information for others and will be involved in a number of projects. Troubleshooting takes up a lot of their time and they're often the first to see potential problem areas in the infrastructure, data or systems/applications.</p> <p>It's key that we suggest improvement ideas to the IT operational which could make their role easier. They want to stay ahead of the game, so create content which evokes that we're innovative and forward-thinking. As they're likely to deliver direct visible results, messaging around user satisfaction can be key and how we've delivered tangible results for others. Make writing tailored for the IT operational relatable, as they're at a stage in their career where they're willing to learn and improve.</p> <p>Main focus could include execution, optimisation, business improvement, updates/upgrades, efficiency, performance, capacity, security, end-user satisfaction, future environment, disaster recovery, backup.</p>

Buyer's journey

Campaigns developed by Proact follow the structure of a pre-defined buyer's journey. This has systematically been developed so content is created which embodies the feelings, pains and priorities of a buyer persona at any given time during the sales' cycle. The messaging and tone we use at each stage will differ, so below are some key techniques to consider when writing at various points of the journey. Simply ask yourself where on this journey your reader might be.

Awareness	<p>The prospect could be unaware that they have an issue with their IT, so we need to inform them about the potential problem and make them relate this back to their environment. At this stage we need to demonstrate a long-term vision and imprint the word "cloud" in the mind of the prospect.</p> <p>Consider what the prospect's priorities are likely to be, asking questions to trigger what they really see as important. Make the prospect think about the potential success they could have, prompt this with results-driven content which can evoke an emotional response.</p>
------------------	--

	<p>Writing produced at this stage needs to establish a sense of urgency – this can be done by making it issue-based. However, please avoid inspiring a sense of fear in the reader.</p>
Interest	<p>Discuss issues which could be relevant to the company by featuring business pains they'll recognise. The prospect can then go away and research this area, following social and news developments. At this stage the prospect often realises their vision on IT, initiating project plans around their business pain.</p> <p>The interest phase is centred around knowledge, so all content must be informative and provide a sense that the prospect can gain control of the situation. They need to start thinking that the potential solutions to their business pains are future proof.</p> <p>Make the prospect name their goals and think about how their current environment is preventing them from reaching these. Provide reliable information and convey that Proact shares this experience and has a vision in this area. The prospect needs to realise that there will be consequences if action isn't taken soon.</p>
Learn	<p>Within this phase, the prospect discovers how they can solve the business pain themselves, referring to multiple sources of information and seeking support from suppliers if necessary. This is where Proact could be considered as they might ask for help from reliable partners – no decisions will be made yet. The prospect is learning about potential solutions to their issues which may or may not be a product/service, therefore content shouldn't be too Proact-focused.</p> <p>In-depth research and information need to be presented on relevant subjects – this can be discussed amongst the ranks and ultimately in the boardroom. Our content needs to try and shape the orientation process and our messaging needs to shift from being issue-based to solution-based. Try to develop a roadmap/vision for the organisation and how their future could be with the solution when the problem has been fixed. Don't push Proact's credentials too much at this stage. Instead, concentrate on solving the problem.</p>
Consideration	<p>At this phase, the prospect will choose one or more of the possible solutions they're presented with. They will be evaluating suppliers and making a shortlist, obtaining quotes to help them shape their decision.</p> <p>As verdicts are starting to be made, we need to emphasise the business case and how we could have a positive impact upon the organisation – this can involve using case studies. Financial clarity is important as often decisions are made based on figures – we should present the prospect with costs vs benefits.</p> <p>The prospect needs to truly understand that Proact offers the right products and services and must trust that our information is transparent and true. Provide customer-specific goals and link these to proven technology. In essence, make the reader think that Proact is the best – we deliver results and we have proof that our clients are satisfied.</p>
Justification	<p>Here we must remove any element of doubt that we're the right choice by justifying our credentials. Feeling and finance will play a part at this stage and will influence a list of pros and cons that have been aligned with various solutions and providers.</p> <p>Keep pushing messages that illustrate what we will deliver to the customer and how we will cooperate. Stress that we will develop a relationship so we can truly understand the prospect's business drivers. Our main asset is our experience and knowledge, so all content must refer back to this – it's this factor which could create added value for the customer.</p> <p>Content should focus around references, business cases, how we organise a partnership and why we are the right match in terms of culture.</p>
Purchase	<p>The prospect buys from Proact but could negotiate their deal with one or more candidates. The provider with the best offer and the best business case will win.</p> <p>We need to reinforce that choosing Proact was the right decision and provide proof relating to the service we will provide. Is there any more value we could get from this customer? Let them know about any additional support/services we offer.</p>

Voice and tone

One way of writing informative yet persuasive copy is by being aware of our voice and tone. What is the difference between voice and tone? Think of it this way: you have the same voice all the time, but your tone changes.

Voice

Our voice is human. It's knowledgeable, friendly and straightforward. Our priority is to explain what we do and how we work, so that customers can see that we'd make a great partner to help them find IT solutions that assist them in achieving their organisation's goals. We want to educate people without patronising or confusing them.

One way to think of our voice is to compare what it is to what it isn't. Our voice is

- confident but not cocky
- smart but not boring
- informal but not sloppy
- informative but not overbearing
- expert but not bossy
- friendly but not laid-back
- innovative but not unrealistic

Tone

Our tone is usually informal, but it's always more important to be clear than entertaining. When you're writing, consider the reader's state of mind. Are they under pressure to meet business demands? Are they puzzled by a technological question? Are they curious about how a cloud partner could help? Once you have an idea about their emotional state, you can adjust your tone accordingly. Ideally, we'd like to demonstrate our expertise so that the reader can have complete confidence that we are the partner for them. We should make them feel comfortable about choosing us or working with us. We should back up any claim we make with evidence to demonstrate our credibility and suitability.

We use a tone that is appropriate to our audience. It's not too familiar or too stuffy, but it is human. A great tone can inspire desirable emotional responses in our readers, which can play a big role in decision-making. Our tone should

- enact the values we espouse and that customers desire – integrity, commitment and excellence
- engage our readers by making it enjoyable to read
- stimulate positive feelings that become associated with our brand
- tie our tone to our business goal: to become the most-trusted partner
- try to communicate enthusiasm and excitement (to elicit the same response in our reader)

We should try to inject a bit of emotion where possible, by talking about hopes, dreams and fears, or simply, feelings. This ties back to authenticity.

It may be hard to weave emotions all the way throughout the copy, so it could be an idea to focus on the headline (E.g., "Unleash the power of data" features emotional language. So does "Heart-stopping IT failure: Make sure your organisation doesn't skip a beat.").

How can we make sure our writing reflects our values?

Our core values should shine throughout all internal and external communications, as they express the fundamental beliefs, concepts and principles that underpin our culture. Let's look at each value individually.

- **Integrity** – This means the being honest and having strong moral principles. We should try to be as honest and transparent as we can when we talk to customers. This plays a vital role in helping us become the world's most-trusted IT partner. We shouldn't try to create false impressions by boasting or making wild marketing claims. This doesn't mean highlighting the negatives, however. For example, if we're writing a Group brochure and a certain service is only available in certain countries, we might not say this outright but rather something like "We offer a range of different services across **different** countries. Please contact your local office for details". Having a consistent tone of voice contributes to creating an impression of trustworthiness. It shows people we care about we create. It shows we have standards. It shows we're a group of people you can trust with your IT and your data.
- **Commitment** – We use commitment to mean "Engagement, service, flexibility, customer focus, fairness and heart". Focus on the customer and their needs. Too often, we talk about ourselves. Try to tweak that slightly to discussing how we help the customer achieve their goals. Fairness and heart may be trickier to address, though if we're honest and passionate and allow that to come across in our writing, then we'll have these aspects of commitment covered, too.

- **Excellence** – This refers to the quality of our work and of our partners' technology, the skill of our people and the experience that they bring to solving customers' challenges. As always, it's better to demonstrate these facets, rather than simply talk about them, though often we will simply mention them. We strive for excellence when it comes to our copy, too. This means researching properly, following best practices, editing, spell-checking, acting on feedback, continually tweaking and improving.

How can we create an innovative tone?

Be brief, be succinct and simply articulate. Use conversational language. Let customers speak for you.

How can we create a dependable tone?

Use words that feel warm and comfortable. Avoid colloquialisms, exclamation marks or high-emotion devices. Rely on traditional rhetorical devices.

Style tips

Here are a few key elements for writing in our voice. For more information, please see our [Grammar and Mechanics Guide](#).

- **Active voice.** E.g., Telema invested in new infrastructure NOT New infrastructure was invested in by Telema
- **Avoid slang and jargon.** Write in plain English. If the meaning of a word isn't immediately apparent, don't use it. Having said that, if we know we're talking to our peers, there may be technical terms we can use that everyone will understand, though we should realise that our audience may involve non-technical business people, too
- **Write with enthusiasm and excitement.** To elicit the same response in our reader

Grammar and mechanics

Adhering to certain rules of grammar and mechanics helps us keep our writing clear and consistent. This section will lay out our house style, which applies to all content unless otherwise noted.

- **Write for all readers.** Some will read every word you write whereas others will just skim. Help everyone, no matter how they read, by grouping related ideas together and by using descriptive headings and subheadings.
- **Focus your messaging.** Create a hierarchy of information. Lead with the main point or the most important content, in sentences, paragraphs, sections and pages.
- **Be concise.** Use short words and sentences. Avoid unnecessary modifiers.
- **Be specific.** Avoid vague language. Cut the fluff.
- **Be consistent.** Stick to the copy patterns and style points highlighted in this guide.

Guidelines

Abbreviations and acronyms	<ul style="list-style-type: none"> • If there's a chance your reader won't recognise an abbreviation or acronym, spell it out the first time you mention it. Then use the shortened abbreviation for all other references. If the abbreviation acronym is well known, like HTML, use that initially (and don't worry about spelling it out).
Active voice	<ul style="list-style-type: none"> • Use active voice. Avoid passive voice. In active voice, the subject of the sentence does the action. In passive voice, the subject of the sentence has the action done to it. <ul style="list-style-type: none"> ○ Yes: Proact closed the deal. ○ No: The deal was closed by Proact. • Words like "was" and "by" may indicate that you're writing in passive voice. Scan your content to see if these appear and then check if the sentence is passive. • One exception is when you want to specifically emphasise the action over the subject. In some cases, this is fine. <ul style="list-style-type: none"> ○ Your request was sent to our marketing team.
Capitalisation	<ul style="list-style-type: none"> • Don't capitalise random words in the middle of sentences. Here are some words that we never capitalise in a sentence: <ul style="list-style-type: none"> ○ Environment ○ Infrastructure (unless naming Infrastructure as a Service) ○ Hyper-converged ○ Email

	<ul style="list-style-type: none"> ○ Online 																		
Contractions	<ul style="list-style-type: none"> • They're great! They give your writing a human, friendly tone. In most cases, use them as you see fit. 																		
Numbers	<ul style="list-style-type: none"> • Spell out a number when it starts a sentence. Also write out numbers below 10, so one to nine. Use numerals for ordinals, percentages, dates and times. <ul style="list-style-type: none"> ○ Eight new employees started on Monday at 9am. ○ We updated three systems within 24 hours. ○ Proact won 1st prize. • Numbers over three digits get commas: <ul style="list-style-type: none"> ○ 999 ○ 1,000 ○ 150,000 • Write numbers up to 999,999 in full. In a 2nd instance we're happy for you to use the appropriate abbreviation e.g., 999k. • In its first occurrence 1million should be written out but thereafter it can become 1m. 																		
Dates	<ul style="list-style-type: none"> • Dates should take the dd-mm-yyyy format. / or – signs can be used to break numerals. When written, dates should take the following format "Wednesday 4th September, 2016" • If you would like to refer to Proact's age, we recommend saying we've been active "since 1994" rather than writing the number of years. This will give the copy more longevity without the need to update the figure. 																		
Percentages	<ul style="list-style-type: none"> • Avoid writing out the word "percent" – use the symbol %. 																		
Units	<ul style="list-style-type: none"> • Use a space to separate a number and unit of measurement. <ul style="list-style-type: none"> ○ 105 MHz ○ 100 PB ○ 37 °C 																		
Ranges and spans	<ul style="list-style-type: none"> • Use a hyphen (-) to indicate a range or span of numbers. <ul style="list-style-type: none"> ○ It takes 20-30 days. 																		
Telephone numbers	<ul style="list-style-type: none"> • Use spaces to make the number easier to digest. • If your content will be used in multiple countries, include the relevant country code. <ul style="list-style-type: none"> ○ Country codes should be formatted as follows: ○ +44 (0) 1246 266300 																		
Time	<ul style="list-style-type: none"> • Use numerals and am or pm without a space. Don't use minutes for on-the-hour time. <ul style="list-style-type: none"> ○ 7am ○ 7:30pm • Use a hyphen between times to indicate a time period. <ul style="list-style-type: none"> ○ 7am-10:30pm • Specify time zones where relevant, normally if people from numerous countries are attending an event. Your default time zone should be the main area your content will be distributed within. • Abbreviate time zones as follows: <table border="1" data-bbox="483 1522 1453 1736"> <tr> <td>BST</td> <td>BRITISH SUMMER TIME</td> <td>UTC + 1</td> </tr> <tr> <td>CEST</td> <td>CENTRAL EUROPEAN SUMMER TIME</td> <td>UTC + 2</td> </tr> <tr> <td>CET</td> <td>CENTRAL EUROPEAN TIME (standard time)</td> <td>UTC + 1</td> </tr> <tr> <td>EEST</td> <td>EASTERN EUROPE SUMMER TIME</td> <td>UTC + 3</td> </tr> <tr> <td>EET</td> <td>EASTERN EUROPE TIME (standard time)</td> <td>UTC + 2</td> </tr> <tr> <td>GMT</td> <td>GREENWICH MEAN TIME</td> <td>UTC + 0</td> </tr> </table> • Abbreviate decades when referring to those within the past 100 years: <ul style="list-style-type: none"> ○ the 00s ○ the 90s • When referring to decades more than 100 years ago, be more specific: <ul style="list-style-type: none"> ○ the 1900s 	BST	BRITISH SUMMER TIME	UTC + 1	CEST	CENTRAL EUROPEAN SUMMER TIME	UTC + 2	CET	CENTRAL EUROPEAN TIME (standard time)	UTC + 1	EEST	EASTERN EUROPE SUMMER TIME	UTC + 3	EET	EASTERN EUROPE TIME (standard time)	UTC + 2	GMT	GREENWICH MEAN TIME	UTC + 0
BST	BRITISH SUMMER TIME	UTC + 1																	
CEST	CENTRAL EUROPEAN SUMMER TIME	UTC + 2																	
CET	CENTRAL EUROPEAN TIME (standard time)	UTC + 1																	
EEST	EASTERN EUROPE SUMMER TIME	UTC + 3																	
EET	EASTERN EUROPE TIME (standard time)	UTC + 2																	
GMT	GREENWICH MEAN TIME	UTC + 0																	

- the 1890s

Punctuation

Apostrophes	<ul style="list-style-type: none"> The apostrophe's most common use is making a word possessive. If the word already ends in an s and it's singular or plural, just add an apostrophe. <ul style="list-style-type: none"> Proact improved Auxillis' infrastructure... All of Proact's staff... James' sandwich... Apostrophes can also be used to denote that you've dropped some letters from a word, usually for emphasis. This is fine but do it sparingly.
Colons	<ul style="list-style-type: none"> Use a colon (rather than an ellipsis, em dash or comma) to offset a list. <ul style="list-style-type: none"> The customer ordered three types of fruit: apples, pears and bananas. You can also use a colon to join two related phrases. Don't capitalise the word after the colon. <ul style="list-style-type: none"> The customer was faced with a dilemma: the team at Proact seemed like a better fit.
Commas	<ul style="list-style-type: none"> When writing a list, don't use the serial/Oxford comma. <ul style="list-style-type: none"> Yes: Proact can help with backup, storage and software. No: Proact can help with backup, storage, and software. Otherwise, use common sense. If you're unsure, read the sentence out loud. When you find yourself taking a breath, use a comma.
Dashes and hyphens	<ul style="list-style-type: none"> Use a hyphen (-) without spaces on either side to link words into a single phrase, or to indicate a span or range. <ul style="list-style-type: none"> First-time user Monday-Friday Use an em dash (–) with one space on either side to offset a clause in your sentence. Em dashes should not be typed as hyphens (- or --). <ul style="list-style-type: none"> Storage as a Service – one of our Managed Cloud Services – is a highly flexible, available and cost-effective solution. The business thought the IT team was lazy and delaying time to market, but they were wrong – it was the ageing infrastructure.
Ellipses	<ul style="list-style-type: none"> Ellipses (...) can be used to indicate that you're trailing off before the end of a thought. Use them sparingly. Don't use them for emphasis or drama and don't use them in titles or headers. <ul style="list-style-type: none"> "Why is my computer running so slow?" Boris asked. Hugo said, "I don't know..." Ellipses, in brackets, can also be used to show that you're omitting words in a quote. <ul style="list-style-type: none"> "Our IT team had far fewer burdens placed upon them [...] it was great to work with Proact."
Full stops	<ul style="list-style-type: none"> Full stops/periods go inside quotation marks, at the end of sentences and inside bracket clauses if these aren't part of a wider sentence. <ul style="list-style-type: none"> Stephen said: "The project went well." Proact completed the project (and finished within timescales). We worked with the IT Manager and the IT Administrator. (The CIO was unavailable.)
Question marks	<ul style="list-style-type: none"> Use these in the same way you would use full-stops.
Exclamation marks	<ul style="list-style-type: none"> Use exclamation marks sparingly and never more than one at a time. They should be positioned in the same way as full-stops. Never use exclamation marks in failure messages or alerts. When in doubt, avoid!
Quotation marks	<ul style="list-style-type: none"> Use double quotation marks to refer to words and letters, titles of books and direct quotations. Full-stops and commas go within quotation marks. Question marks also follow the logic of full-stops. Use single quotation marks for quotes within quotes. <ul style="list-style-type: none"> Who was it that said, "Business and IT can't work together"? Alex said: "A wise man once told me, 'Proact is the best cloud provider.'"
Semicolons	<ul style="list-style-type: none"> Don't overuse semicolons. They usually support long, complicated sentences that could easily be simplified. Try an em dash (–) instead or simply start a new sentence.
Ampersands	<ul style="list-style-type: none"> Don't use ampersands unless it's part of a company or brand name. <ul style="list-style-type: none"> Ben and Dan Ben & Jerry's We also accept usage in service taglines and headings, but not within body copy.

Word choices and formatting

Titles and headings	<ul style="list-style-type: none"> Initial titles of documents as well as subsequent headings should be written in sentence case. This means only the first letter and all proper nouns as well as letters following a colon are capitalised. Sentence case is prone to fewer mistakes and simple to implement. <ul style="list-style-type: none"> Yes: Proact's newest acquisition to broaden expertise around container technologies No: Proact's Newest Acquisition to Broaden Expertise around Container Technologies
Pronouns	<ul style="list-style-type: none"> If your subject's gender is unknown or irrelevant, use "they", "them" or "its" (as a singular pronoun). Don't use "one" as a pronoun. We refer to businesses and organisations as singular entities, therefore: <ul style="list-style-type: none"> Proact is selling this service. Proact is growing – it now has over 600 employees – and profits are increasing. Try to use "we" where possible. It's warmer, more friendly and it helps us talk about ourselves in a personal way, instead of us talking about a separate entity.
Names and job titles	<ul style="list-style-type: none"> The first time you mention a person in writing, refer to them by their first and last names. In all other instances, refer to them by their last name. Capitalise the names of teams and departments, but not the words "team" or "department". <ul style="list-style-type: none"> The Marketing team is working hard to deliver its targets. The Sales department performed well this quarter. Capitalise individual job titles which are attributed to a single person, but not generalised usages of titles. <ul style="list-style-type: none"> Danny Duggal, VP of Commercial, worked on this project. Danny Duggal, the copywriter at Proact, makes excellent cocktails. The increasing demands of end-users mean that IT managers are having to face new challenges.
Slang and jargon	<ul style="list-style-type: none"> Write in plain English. If you need to define a technical term that's advanced even for an IT professional, briefly define it so everyone can understand.
Text formatting	<ul style="list-style-type: none"> Avoid using italics. Use quote marks to indicate the titles of works. Use bold to highlight important messages/words. Left-align text, never centre or right-aligned. Leave one space between sentences, never two.
Write positively	<ul style="list-style-type: none"> Avoid words such as "can't", "don't" etc. <ul style="list-style-type: none"> Yes: To get the most out of the software, you need to follow the instructions. No: If you don't follow the instructions, you won't get the most out of the software.
Referring to Proact	<ul style="list-style-type: none"> To make Proact seem inclusive and caring, we usually refer to ourselves in the first person. This warmth is important. It helps people to see us as more dependable. This means using the words "we" and "our". There is no need to repeat phrases like "Here at Proact". There is no need to repeat our name for SEO purposes on our website, either. Our Proact url will ensure we're associated with any other key phrases we're using.
Talk directly to people	<ul style="list-style-type: none"> Where possible, refer to the audience as "you" to bring power and relevance to our communications. There will be circumstances where we need to discuss "customers", but in these instances try to state why the statement is beneficial to the reader. <ul style="list-style-type: none"> We can help you reach previous unknown levels of data availability. We have customers across almost every vertical which clearly illustrates that we have the skills and acumen to make a difference within your company. As a rough rule of thumb, try to use the second person pronoun "you" as a first choice, with scatterings of "our customers/clients" to portray the successful work we've already completed.

Writing for translation

We should bear in mind that any copy we write, especially that of “Group”, is going to be translated into other languages. For that reason, we don’t use language that relies heavily on colloquialisms. We keep it simple, clear and succinct.

Basics

Try to write your content in standard, straightforward English than can be understood by people whose first language isn’t English. It’s much easier for a translator to clearly communicate ideas written in easy, uncomplicated sentences.

Here are some guiding principles to follow:

- **Use active voice.** Always aim for this, especially when writing for translation.
- **Use the subject-verb-object sentence structure.** It’s not used by all languages, but it’s widely recognised.
- **Keep it simple**
- **Keep it clear**
- **Keep it succinct**

Guidelines

Consider cultural differences	<ul style="list-style-type: none"> • Avoid references to things of local or regional importance. Also be wary when using idioms as descriptions.
Prioritise clarity	<ul style="list-style-type: none"> • Keep your copy brief, but don’t sacrifice clarity for brevity. You may need to repeat or add words to make the meaning of your sentences clear to a translator.
Repeat helping verbs which belong to multiple main verbs	<ul style="list-style-type: none"> • Yes: Proact will send your brochure in the post or can send your brochure in an email. • No: Proact will send your brochure in the post or in an email.
Repeat subjects and verbs	<ul style="list-style-type: none"> • Yes: Premium Support + includes 24/7 support, but standard support does not. • No: Premium Support + includes 24/7 support, but not standard support.
Repeat markers in a list or series	<ul style="list-style-type: none"> • Yes: Use Proact to monitor your systems, to back up your files and to secure your data. • No: Use Proact to monitor your systems, back up your files and secure your data.

Avoid ambiguity

Many aspects of our everyday speech have the potential to cause confusion for translators and non-native English speakers. Here are some of the big trouble spots to avoid:

Avoid unclear pronoun references	<ul style="list-style-type: none"> • Yes: Many believe that their data is secure because they have anti-malware. This software doesn’t provide sufficient protection and data security breaches can happen which can put your information at risk. • No: Many believe that their data is secure because they have anti-malware. This isn’t the case and can ultimately put your information at risk.
Avoid –ing words	<ul style="list-style-type: none"> • In English, many different types of words end in –ing: nouns, adjectives, progressive verbs etc. However, a translator who is a non-native English speaker may not be able to recognise the distinctions and might try to translate them all in the same way. Because of this, we need to try and avoid using –ing words when possible, but not when they’re part of a noun’s name e.g., “graphing calculator”.
Gerunds (not applicable for all languages)	<ul style="list-style-type: none"> • Yes: In this article we will talk about infrastructure management. • No: In this article we will talk about managing infrastructure.
-ing adjectives	<ul style="list-style-type: none"> • Yes: As a top priority, there is the management team with smiles on their faces.

	<ul style="list-style-type: none"> No: As a top priority, this is the smiling management team.
-ing forms of verbs	<ul style="list-style-type: none"> Yes: Several developers are currently working on that feature. No: Several developers are working on that feature. (When you can't easily avoid the -ing word, it may help to add an adverb to clarify the meaning.)
Other mechanics to avoid	<ul style="list-style-type: none"> Slang, idioms and clichés Contractions Shortened words, even if they're common in English Uncommon foreign words (use "genuine" not "bona fide") Unnecessary abbreviations (use "for example" not "e.g.") Double negatives
Beware of words with multiple meanings	<ul style="list-style-type: none"> Where possible, find alternative phrases. <ul style="list-style-type: none"> "Once" could mean "one time", "after", "in the past" or "when" "Right" could mean "correct", "the opposite of left" or "politically conservative" "Since" could refer to a point in time or be used as a synonym for "because" "Require" plus an infinitive could confuse the relationship between subject and object "Has" or "have" plus past participle

Numbers

Measurements	<ul style="list-style-type: none"> When writing for an international audience, use the metric system. Spell out all units and avoid abbreviations.
Currency	<ul style="list-style-type: none"> Indicate currency by using its three-letter abbreviation, such as EUR or GBP, before using currency symbols. Avoid colloquial phrases that relate to money such as "quid"

Word list

All collateral written by Proact should use British English as this is the preferred choice of our European audience and distinguishes us from our US competition.

The following spellings are worth considering:

UK spelling (preferred)	US spelling
Organisation	Organization
Data centre	Data center
Recognise	Recognize
Analyse	Analyze
Travelled	Traveled
Defence	Defense
Licence (dependent on context)	License
Catalogue	Catalog or catalogue
Behaviour	Behavior
Categorise	Categorize
Centralise	Centralize
Channelled	Channeled
Colour	Color
Computerise	Computerize
Digitised	Digitized

Favour	Favor
Fulfil	Fullfill
Instil	Instill
Manoeuvre	Maneuver
Metre	Meter
Mobilise	Mobilize
Mould	Mold
Pretences	Pretenses
Prioritisation	Prioritization
Scrutinise	Scrutinize
Stabilise	Stabilize
Tyres	Tires
Unrivalled	Unrivalled
Visualisation	Visualization
Virtualisation	Virtualization

Frequently asked questions

Some stylistic concerns regularly occur when writing Proact collateral. Have any to add? Contact the Group Copywriter to submit your suggestion.

What do we use as a reference?

We base the guidelines here on the latest version of the Cambridge Dictionary of English, available here: <https://dictionary.cambridge.org/>.

Who should I contact if I'm not sure if my writing is correct?

Contact Erin Lutenski, Group Copywriter. She'll be happy to answer your questions, proofread text you've written or help craft some copy in the first place.

What materials do these rules apply to?

All written communications, including customer-facing copy, such as emails, brochures and press releases, as well as internal communications.

1.1 Common Mistakes

Hyphens in service names	<ul style="list-style-type: none"> • Yes: Proact offers Infrastructure as a Service. • No: Proact offers Infrastructure-as-a-Service.
Referring to Proact as a plural	<ul style="list-style-type: none"> • Yes: Proact is a leading cloud storage integrator and cloud service provider, and with its head office in Chesterfield, your data won't be stored far away. • No: Proact are a leading cloud storage integrator and cloud service provider, and with their head office in Chesterfield, your data won't be stored far away.
Referring to data as a plural	<p>In the IT industry, "data" is written as a mass (singular) noun.</p> <ul style="list-style-type: none"> • Yes: This data is very complex. • No: These data are very complex.
Apostrophe in SLAs	<ul style="list-style-type: none"> • Yes: We'll help you meet your demanding SLAs. • No: We'll help you meet your demanding SLA's.
On-premises	<ul style="list-style-type: none"> • This is to be written as one word with a hyphen when it occurs before a noun (otherwise no hyphen). In alignment with our partners, we refer to "on-premises" rather than "on-premise".
Wi-Fi	<ul style="list-style-type: none"> • Write as above, not "wifi" or "WiFi". **Exception: SD-WiFi (no hyphen)**
CapEx and OpEx	<ul style="list-style-type: none"> • To be written with a capitalised "E", not as CAPEX or Capex.

Capitalisation of “cloud” when it isn’t the name of a service	<ul style="list-style-type: none"> • Yes: Proact offers services for the public cloud. • No: Proact offers services for the Public Cloud.
Vendor names	<ul style="list-style-type: none"> • Here at Proact our vendor relationships are important to us. For both clarity and respect, please ensure that vendor names are spelt and formatted correctly. For example: <ul style="list-style-type: none"> ○ VMware ○ NetApp ○ Commvault ○ SimpliVity
Data centre	<ul style="list-style-type: none"> • In accordance with our boilerplate text which acts as our company mission statement, “data centre” is two words and spelt in British English.
Round-the-clock service	<ul style="list-style-type: none"> • Yes: 24/7 • No: 24x7
Business Cloud Alignment	<ul style="list-style-type: none"> • Don’t hyphenate this term. We also capitalise this as it is the name of a Proact service.
Roadmap	<ul style="list-style-type: none"> • Write “roadmap” as a single word.
Service Management	<ul style="list-style-type: none"> • We need to be a little careful here. Service Management (with capitals) is our fully comprehensive support package. Service management is management of a service.
Portfolio Wheel	<ul style="list-style-type: none"> • This term is specific to Proact. Therefore, please capitalise the first letter of both words.
Backup / backup	<ul style="list-style-type: none"> • Write “backup” if used as a noun and “back up” if used as a verb.
Onsite	<ul style="list-style-type: none"> • “On-site” is okay before nouns, but the unhyphenated version can always be used.
Cyberattack	<ul style="list-style-type: none"> • Written as one word.
Cybercriminal	<ul style="list-style-type: none"> • Written as one word.
Cybersecurity	<ul style="list-style-type: none"> • Written as one word.
End-user / end user	<ul style="list-style-type: none"> • When modifying a noun (e.g. “The end-user experience”) the term should be hyphenated, but when it is used as a noun on its own, (e.g. “It’s perfect for end users”) this isn’t necessary.
